

OK, this list is being developed for the sole purpose of providing information to parent groups and educators for the monitoring of information relating to their **CHILDREN**... this is not intended to promote use for adults and/or spouses. Keep in mind that the feds recently passed a law regarding downloading programs on phones to spy or keep track of adults. ***It is now a federal crime to do without the other adults consent.*** These are **just recommendations** and as we all know can change without notice so do you own DUE DILIGENCE on this...

****NOTE**** There are not many FREE apps, have parents read the **fine print** before they buy the apps... Most run around \$50/ annually. Most track location, texts, phone calls, emails, etc. ****NOTE**** some of these require that the phone be **JAILBROKEN/ROOTED** so pay attention to what you are purchasing.

Stealthphonespy (<http://stealth-phone-spy.soft112.com/>)

- Stealth Phone Spy is an invisible spy software which allows you to secretly record all activities of your smartphone.
- Stealth Phone Spy allows you to listen to actual phone calls and record every SMS and log every call.
- All the calls and SMS logs are uploaded to your online account.
- Stealth Phone Spy starts automatically at every phone boot and records every SMS message sent or received, logs all inbound and outbound phone calls, records the visited websites and many more.
- Basically, all the actions performed on the phone are recorded. Stealth Phone Spy silently records GPS locations at a rate decided by the owner of the phone.
- Stealth Phone Spy is compatible with Android, iPhone, iPad, BlackBerry, Symbian OS, Windows Mobile.

Qustodio Qustodio- **supports most multimedia devices**

-  **Understand**
 - A simple dashboard makes it easy to understand how your child uses devices, apps and the web.

Netnanny- **good value**

Parental control software monitors, documents activities, and blocks unsafe materials while allowing kids access to the Internet.

- As the world's foremost authority on Internet security for families, Net Nanny can protect viewers from the following:
 - Pornography
 - Cyber Bullying
 - Online Predators
 - Social Network Dangers
 - Internet Addiction
- Net Nanny uses proprietary technology that includes
 - Dynamic content filtering: Offensive material is removed according to your settings
 - Parental controls: Set access by specific keywords, games, and websites according to each user.
 - Get email alerts: Have emails sent to you when your child visits inappropriate sites.
 - Monitor Social Media: You can monitor your child's posts and chats on Facebook.

For more info, the following further highlight the importance of filtering the Internet for the protection of your family.

Webwatcher

- WebWatcher, the #1 rated Parental & Employee Monitoring Software, offers a full family of monitoring software compatible with PC, Mac, iPhone, Android & BlackBerry.
 - All WebWatcher products install easily in 5 minutes or less, are undetectable (and thus tamper proof) and all recorded data is sent to a secure web-based account which allows you to monitor kids and employees at your convenience from any computer.
 - WebWatcher allows you to monitor multiple devices (such as a PC and an iPhone) from the same user interface so you get one unified view.
 - **Pros:** Records absolutely all activity on the child's computer.
 - Full stealth installation.
 - All configuration and reports via online portal.
 - Real-time email notification when "alert words" appear.
 - Optional Web content filtering.
 - Can block or time-limit programs.
 - Dashboard offers many views
-
