
Legacy Building Update, December 2025

- Asbestos has now been removed from the chapel area
- Utilities have been rerouted and on December 4, the Suter Building was shut off to allow the completion of the utilities rerouting and reconnecting. What was originally thought would take 3 days was done in one day. Friday and Saturday were used to make sure everything was back up and running in preparation for Sunday and the CDC's use on Monday.
- The temporary walls have begun to be built to separate the Suter Building from the area to be demolished. Once those walls are complete, a delicate demo will begin to separate the two areas. The delicate demo will provide approximately 2-3 feet of clearance from the ground to the sky between the two buildings, which will then allow the demo of the building to commence.
- The removal of the trees has begun around the property.
- We continue to wait for the communication companies and ONCOR to remove or relocate the overhead lines located on Avenue D and 9th street.
- The construction fence has been installed and now all the area inside the fence and temporary walls (area to be demo'd) are considered a construction zone and hard hats are required as well as permission to enter must be obtained from Talley Riggins.
- Demolition of the building will start in mid-January.
- Continuing to wait to receive the site permit which will then allow the building permit to be released. Demo permit is in hand. Currently waiting on the latest review by the city.
- An agreement with Oncor to move the overhead lines on 9th street to underground has been signed, but we have not received the schedule at this time.
- The three communication companies with lines along the north side of Avenue D, between 9th Street and Glenbrook, have been contacted and arrangements have been made to move those lines.

Specific Prayer Requests

- Pray for 100% of our members to be involved in some way in the Legacy Building project.
- Pray that we will continue to meet our church budget as well as we continue to minister in the name of Jesus.
- Pray for God to continue to be in the entire process and lead us divinely.
- Pray that FBCG will learn aspects about God and His character through the building project and God will grow our faith as we are built into a habitation of God as His people while the church building is constructed physically.
- Pray for God to provide the resources needed for this project.
- Pray that wise plans are made with all the different logistic changes being made to make sure we keep people safe.
- Pray for God's direction as we plan on adding a 3rd English speaking service.
- Pray that the workers who come to our campus will sense the presence of God while they are here.
